## **Theory of Computation**

## **Exercise 8: (Context-free grammar part 1)**

1. Prove that the following grammar is ambiguous.

$$S \rightarrow S + S \mid S - S \mid S * S \mid S/S \mid c$$

on wing a shind a join a sur हन्द्रेग

 $\frac{1}{2}$   $\frac{1$ 

2. Find CFG for the language L.

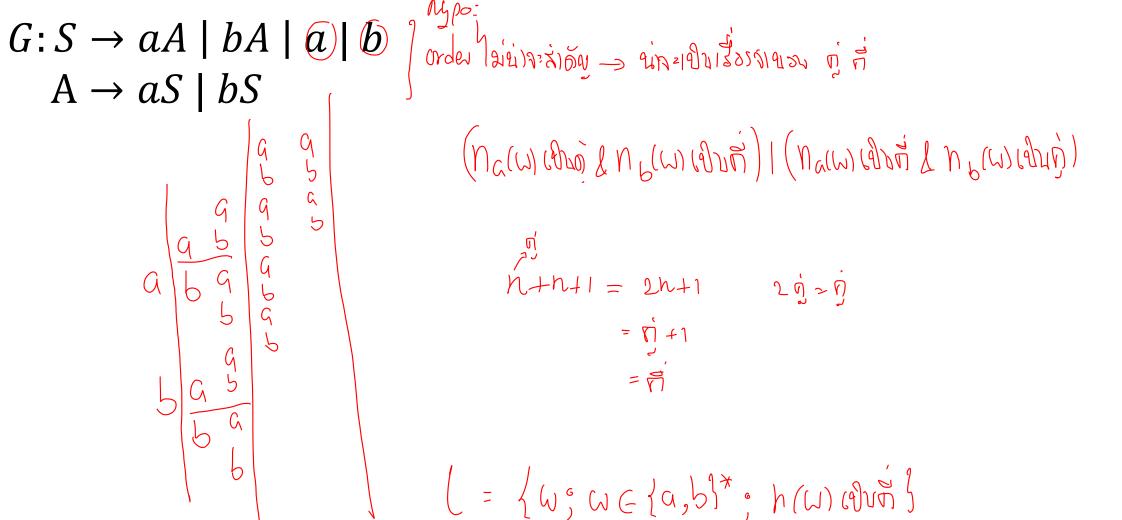

$$L = \{ a^i b^j : i \leq j \}$$

$$\text{with an instance } s \rightarrow assix ; \text{ with } i = j$$

$$\text{In } b \text{ B lb} ; \text{ in B law } x \text{ for } i = j$$

## \*3. Find the language of the following grammar.

(Submit 6)

$$G: S \to aA \mid bA \mid a \mid b$$

$$A \to aS \mid bS$$

$$A \to aS \mid bS$$

$$n + n + 1 = 2n + 1$$
 $2 \hat{n} > \hat{n}$ 
 $= \hat{n} + 1$ 
 $= \hat{n}$ 

$$L = \{\omega; \omega \in \{\alpha, b\}^*; h(\omega) \text{ equals}\}$$
